Notes:

Paints are satin finish or flat

When painting stucco, color mix will need to be adjusted for that material. Advise the store where you purchase your paint or your contractor.

Colors show approximate the dry paint color. The actual color will vary depending on the type of paint, gloss level, application technique, film thickness variances, substrate, light source, brand, and calibration of the paint mixing equipment. For critical color matches, a sample of paint (2 coats) should be applied, allowed to dry, and

The ARC may require paint samples to be painted on the home to ensure the best match with existing stone/brick work on the home.

**Note: Only homeowners in Phase 1 of the development are able to paint these colors as of June 2011. You are restricted from choosing another Phase 1 palette than your current Phase 1 palette.**
